

M. M. Institute of Computer Technology & Business Management M.M. (Deemed to be University), Mullana			Tutorial Sheet 05	
Session: 2025-2026 (Odd)		Class/Semester: BCA– 3 rd Semester(Section I)		
Subject Code: BCA-304		Subject Name: Operating System		
Lecture: 3		Tutorial: 1		
Max. Marks Theory: 60		Max. Marks Sessional: 40		Credits: 4.0
Assigned Date:01/10/2025		Submission Date: 8/10/2025		Distribution Date:
Q. No.	Questions			Marks (Total Marks - 18)
1.	Why Memory Management required in computer system?			01
2.	What is page table?			01
3.	Define swapping?			01
4.	What is logical and physical address Space?			01
5.	Explain different techniques of Contiguous memory Allocation.			02
6.	Explain fragmentation. Also explain the solution of this problem.			02
7.	Explain segmentation in detail.			04
8.	Explain paging in detail.			06

Assignment Outcome (AO):

- Understand the concepts of memory management.
- Understand paging and segmentation.

Course Outcome (CO): After completion of this course, student can:

- Understand the fundamental components of a computer operating system.
- Compare and illustrate various process scheduling algorithms.
- Understand the concepts of deadlock in operating systems and its management & avoidance.
- Understand the design and management concepts of main memory and virtual memory.
- Understand the file allocation methods, different types of directory systems and file protection.

Bloom's Taxonomy Level (BTL):

- Remembering
- Understanding
- Applying
- Analyzing
- Evaluating
- Creating

Question wise Mapping Matrix (with AO, CO, BTL)								
Q. No.	1	2	3	4	5	6	7	8
AO No.	1	1	1	1	1	1	2	2
CO No.	4	4	4	4	4	4	4	4
BTL	1	1	1	1	2	2	2	2
Marks	1	1	1	1	2	2	4	6

	Weightage (in %age)
AO	1:75% 2:25%
CO	4:100%
BTL	1:50%,2:50%
